

USING SCRUM SUCCESSFULLY – THE NEXT STEP

Course Descriptions

You have already had initial experience with Scrum and may have already achieved Scrum Master or Product Owner certification. Now it is a matter of taking the acquired knowledge and the first experiences made one step further and working successfully with Scrum.

The event is designed as a workshop in which we work together on real challenges in everyday Scrum life and find pragmatic solutions that will help you in your specific area of application.

In the course of the course, in addition to knowledge transfer, exchange and group work, we will carry out an extensive agile simulation for one day using the Lego® Serious Play® method.

In order for us to be able to work together optimally within the framework of the Lego Serious Play Simulation, we only offer this course as a face-to-face event. If you would like online training on similar topics, please contact us.

Learning Outcomes

- In-depth understanding of Scrum's success factors.
- Learn and try out tools that will make you and your Scrum Team more successful.
- Answers to specific, personal experiences and challenges in your implementation of Scrum.
- Introduction and experience of the Lego® Serious Play® method

Who Should Attend?

The participants of this course should have previous experience in the implementation of Scrum and ideally be working in one of the roles below:

- Scrum Master
- Product Owner
- Scrum Developers
- Agile Coaches with Scrum Experiences
- Leaders with Scrum Experiences

We are happy to offer separate training courses for beginners on request.

Course Rates

Early Bird: 2025 CHF | Regular: 2250 CHF

Duration

3 days

Delivered By

Christoph Bisel

In 1999, Christoph put his existing experience as a project manager on a solid footing with a degree in project management with a federal certificate. Since then he has managed projects of various sizes for various companies and was also responsible for the project management of various national branches of an american software manufacturer. He is an accredited trainer for the project management frameworks Prince2™, Prince2™ Agile and AgilePM® (DSDM Framework).

He first came into contact with Scrum in 2008 and since then has continuously expanded his knowledge and experience with this framework and other frameworks.

Christoph has coaching training as well as a degree and experience as a mediator and is therefore not only able to provide professional support, but also to provide support in personally challenging situations.

As a trainer, consultant and coach, he has been supporting companies in Europe in project management, Scrum, Kanban, Design Thinking, Lego® Serious Play®, OKR and various other methods and frameworks for 5 years.
