

COMBINING SCRUM AND KANBAN SUCCESSFULLY

Descripción del Curso

Many teams experience the challenge of successfully planning sprints and successfully completing all planned tasks at the end of the sprint. The combination of Scrum and Kanban can offer a decisive advantage here.

In this course you will learn how to successfully combine Scrum and Kanban. To do this, we will provide you with the necessary knowledge of Kanban and work together to develop the combination of both frameworks. Scrum knowledge as part of a Scrum basic training is required for this course.

Resultados

• You know how to successfully use Kanban in knowledge-based environments (IT, marketing, etc.).
• You understand the metrics of Kanban and can use them as a basis for continuous improvement.
• You know how to use Kanban to optimize your Scrum implementation.
• You know the success factors and framework conditions.

Quién Debería Asistir

The participants of this course should have previous experience in the implementation of Scrum. We are happy to offer separate training courses for beginners on request.

- Scrum Master
• Product Owner
• Scrum Developers
• Agile Coaches with Scrum Experiences
• Leaders with Scrum Experiences

Curso impartido por

Christoph Bisel

In 1999, Christoph put his existing experience as a project manager on a solid footing with a degree in project management with a federal certificate. Since then he has managed projects of various sizes for various companies and was also responsible for the project management of various national branches of an american software manufacturer. He is an accredited trainer for the project management frameworks Prince2™, Prince2™ Agile and AgilePM® (DSDM Framework).

He first came into contact with Scrum in 2008 and since then has continuously expanded his knowledge and experience with this framework and other frameworks.

Christoph has coaching training as well as a degree and experience as a mediator and is therefore not only able to provide professional support, but also to provide support in personally challenging situations.

As a trainer, consultant and coach, he has been supporting companies in Europe in project management, Scrum, Kanban, Design Thinking, Lego® Serious Play®, OKR and various other methods and frameworks for 5 years.
